

My peaceful place

What is peace? I feel that in my head it is quiet and soft but in my heart it's a million different things. For example, watching the world go by, listening to the crashing waves, hearing the birds sing and when the whole world STOPS.

My favourite place is where most people go everyday, my peaceful quiet garden. My head relaxed in the soft bouncy grass, with my eyes in the clouds naming every one I see. My favourite cloud of all is the roaring lion with its mouth open and seeing the sharp teeth imagining what it's like to fly or be a animal.

My favourite imaginary place would not really be a place it would be my whole family and I riding horses through a peaceful green field with the sun beaming on us and only hearing the thundering of horses hoofs on the ground, my heart beating so fast and the laughter of my family right beside me!

What is peace? Peace to me is laughter, fun and gentleness. We can all find peace some way and some how!
